Office Action Summary	Application No. 09/944,080	Applicant(s) FUKUDA ET AL.	
	Examiner Antonio A. Caschera	Art Unit 2628	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. Receipt is acknowledged of a request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e) and a submission, filed on 7/23/2007.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in the pending application.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 33-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In reference to claims 33-36, the claims comprise the limitation of, "...said configuration of at least one of the plurality of hardware input/output devices configures at least one of an external monitor output, a television output, screen luminance, and output volume," (see lines 3-5 of claim 33, for example) which is indefinite as the Office is unclear as to which limitation(s) the above passage of the claim refers to from independent claims 17, 19, 25 and 27 from which claims 33-36 depend upon respectively. Further, there is no mentioning of "configuring" of

Art Unit: 2628

“hardware input/output” devices in any of claims 17, 19, 25 and 27 therefore such limitations of claims 33-36 fail to particularly claim the subject matter which Applicant regards as the invention.

The Office poses the question, does Applicant mean to equate the “configuring” of “hardware input/output” devices of claims 17, 19, 25 and 27 to the displaying and/or selection of processing items as recited in claims 17, 19, 25 and 27? The Office is genuinely unsure as to what exactly the above limitation comprised within claim 33-36 truly signifies and therefore requires a clarification/amendment to the claims to overcome this rejection and distinctly and clearly claim subject matter which Applicant regards as the invention.

Response to Arguments

4. The cancellation of claims 37-44 is noted.
5. Applicant’s arguments, see pages 20-24 of Applicant’s Remarks, filed 06/26/07, with respect to 35 USC 103(a) rejection of claims 1, 3, 5-9, 11, 13-17, 19, 21-25, 27 and 29-36 have been fully considered and are persuasive. The prior art rejection of the claims has been withdrawn.

Allowable Subject Matter

6. Claims 1, 3, 5-9, 11, 13-17, 19, 21-25, 27 and 29-32 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

In reference to claims 1, 9, 17 and 25, the prior art of record (Bird (U.S. Patent 5,341,154), Miyagawa et al. (U.S. Patent 5,594,619), Crooks et al. (U.S. Patent 5,208,736) and

Art Unit: 2628

Isashi (U.S. Patent 5,898,600)) does not explicitly disclose the information processing device as claimed including the first and second processing/operating means/units, one of which is located outside a display body of the device, separate from the keyboard configured to be operable when the display body is in each of an open position and turned rotated position and the other processing/operating means/units is located on the display body but outside of and operating independently of contact with the display and operable when the display is in the turned rotated position wherein both first and second processing/operating means/units are located on the same side of the display when the display is in the open position while the first processing/operating means./unit further comprising an operating button and the second processing/operating means/unit comprises an operating device for displaying and selecting of a system menu showing processing items, in combination with the further limitations of claims 1, 9, 17 and 25 respectively.

In reference to claims 5, 7, 8, 13, 15, 16, 21, 23, 24, 29 and 31, claims 5, 7, 8, 13, 15, 16, 21, 23, 24, 29 and 31 depend upon claims 1, 9, 17 and 25 and are therefore also deemed allowable.

In reference to claims 3, 11, 19 and 27, the prior art of record (Bird (U.S. Patent 5,341,154), Miyagawa et al. (U.S. Patent 5,594,619), Crooks et al. (U.S. Patent 5,208,736) and Isashi (U.S. Patent 5,898,600)) does not explicitly disclose the information processing device as claimed including the photographing case with photographing function, the first and second processing/operating means/units, one of which is located outside a display body of the device, separate from the keyboard configured to be operable when the display body is in each of an open position and turned rotated position and the other processing/operating means/units is

Art Unit: 2628

located on the display body but outside of and operating independently of contact with the display and operable when the display is in the turned rotated position wherein both first and second processing/operating means/units are located on the same side of the display when the display is in the open position while the first processing/operating means./unit further comprising an operating button and the second processing/operating means/unit comprises an operating device for displaying and selecting of a system menu showing processing items, in combination with the further limitations of claims 3, 11, 19 and 27 respectively.

In reference to claims 6, 14, 22, 30 and 32, claims 6, 14, 22, 30 and 32 depend upon claims 3, 11, 19 and 27 and are therefore also deemed allowable.
